

Los Lobos Sanctuary

An International Wellness and Wisdom Community
Loslobossanctuary.com

OUR VISION

Los Lobos is our home, where we spend half of the year (the other half between Europe and the USA.) We love it because it is an immersive community of explorers and sacred dreamers.

We grow our own organic food, we harvest water from our own wells, and we get to sit with renowned spiritual masters and teachers.

At Los Lobos we explore our inner landscape, discover ancient wisdom, and embrace pristine nature. We enjoy world class cuisine and good friends.

We are reaching out to a few like minded souls to join us as seasonal or full-time residents and help us create a global spiritual center.

GROW A NEW BODY CUISINE

The kitchen is our alchemical laboratory, where we create foods that switch on the body's innate repair and regeneration systems.

The Los Lobos chefs prepare dishes that silence the genes that create the illnesses of ageing and switch on the genes for health and longevity.

You grow a new body every 7 years. You can reverse your biological clock to make sure that your healthspan equals your lifespan.
